

September 27, 2021

## NORTH MEDIA A/S (CPSE: NORTHM)

North Media A/S, established in 1965, has built a diverse portfolio of companies that link businesses and consumers, primarily in Denmark and other Nordic countries. Its Last Mile business area operates FK Distribution, a distribution service that delivers direct mail and leaflets to consumers. Its smaller, but fast-growing Digital Services unit includes BoligPortal, a Danish home rental platform; Ofir, a job search platform; and Bekey, a provider of digital access solutions for multistory buildings and private homes.

### COMPANY HIGHLIGHTS

- \* NORTHM: Connecting Businesses and Consumers
- \* North Media has used earnings and cash flow from its mature Last Mile local advertising unit to develop its faster-growing Digital Services businesses, including home rental and job search platforms. The company is also expanding into Sweden and Germany.
- \* We expect the Digital Services unit to post double-digit revenue growth and expand its EBIT margin over the next several years. Digital Services EBIT improved from negative 1.4 million DKK in 2019 to positive 18.4 million DKK in 2020 and the EBIT margin rose to 14.0% from negative 1.3% in 2019.
- \* We believe that returns from North Media's internal portfolio of long-term securities, solid cash dividend, and commitment to periodic share buybacks add to its total return potential. This securities portfolio appreciated by 154.5 million DKK and 122 million DKK in 2020 and 2019, respectively. The annualized dividend of 5 DKK per share currently yields 4.1%, after a more-than 50% year-to-date stock appreciation. Since 2017, North Media has returned nearly 300 million DKK to investors through dividends and stock buybacks.
- \* NORTHM shares are trading at a significant discount to peers based on multiple metrics, including P/E and EV/EBIT. We believe that the stock merits a valuation closer to benchmark averages based on the company's strong EBIT margin, prospects for growth in the digital businesses, and focus on returns to shareholders. Our fair value estimate is 191 DKK, well above the current price of 123 DKK.

COMPANY SPONSORED REPORT. SEE LAST PAGE FOR DISCLOSURES.

## INVESTMENT THESIS

North Media, established in 1965, has built a diverse portfolio of companies that link businesses and consumers in Denmark. Its Last Mile business area operates FK Distribution, a distribution service that delivers direct mail, leaflets, and free weekly newspapers to practically every household in the country, as well as digital offerings and leaflet packaging services to third parties. Its smaller, but fast-growing Digital Services unit includes BoligPortal, a market-leading Danish home rental platform; Ofir, a job search platform; and Bekey, a provider of digital access solutions for multistory buildings and private homes. North Media is using cash generated by the established FK Distribution business (87% of 2020 revenue and 97% of group EBIT) to develop its newer digital businesses. We expect these businesses, which have recently become profitable, to account for up to 25% of revenue over the next 2-3 years, up from 15% in 2020. Over the long term, we also expect North Media to continue its international expansion, with new initiatives in Sweden, Germany, and other markets.

The Last Mile business area has a record of solid and stable earnings. It is Denmark's leading distributor of leaflets, local newspapers, and direct mail, and has expertise in sorting, packing, and distributing printed advertising to households. The service has supported brick-and-mortar retailers, which have remained a key part of the Danish economy despite increased digitization. Last Mile reaches up to 2.8 million households as well as 650,000 high-frequency users through a digital distribution platform. Its app has been downloaded by nearly 2 million users.

Last Mile has maintained strong earnings growth despite largely flat revenue. In 2020, revenue fell 2% to 914 million DKK due to the COVID-19 pandemic. In response to the past year's volume decline, the company reduced weekly distribution rounds from two to one and discontinued the development of noncore platforms. As a result, the Last Mile EBIT margin was 25.6% in 2020, up from 18.4% in 2019.

Management expects the core Last Mile business area to stabilize following several years of annual volume declines of approximately 8% and has recently rolled out new initiatives to help mitigate these declines. In 2020, it began to provide packing services for Germany's Deutsche Post. FK Distribution packaging uses biodegradable paper wrap to replace the plastic wrap formerly used by Deutsche Post. The company initially provided packaging for 143,000 households in Flensburg, Germany, but the cooperation was extended to 480,000 households in July 2021. We believe the partnership represents an incremental growth opportunity that we think could be expanded as early as 2022.

In 2020, Digital Services revenue rose 20% and contributed approximately 13% of total revenue. Digital Services EBIT im-

proved from negative 1.4 million DKK in 2019 to positive 18.4 million DKK in 2020 and the EBIT margin rose to 14.0% from negative 1.3% in 2019. North Media expects the Digital Services segment to generate annual 20% organic revenue growth and further earnings growth over the next years and reach an EBIT margin near 25% in 2023.

The most well-established Digital Services business is BoligPortal, a market-leading Danish home rental platform that offers services to verified landlords and tenants. BoligPortal has also begun a similar site in Sweden that has the potential for strong growth. In 2020, BoligPortal revenue rose 19% to 82 million DKK, reflecting 15% growth in Denmark and 60% growth in Sweden. EBIT jumped 72% to DKK 27 million, marking the third straight year of EBIT expansion. The company focuses solely on the rental market and has no activities in the sales market.

We are encouraged by the resiliency of the rental home market in Denmark, which expanded in 2020 despite the pandemic. BoligPortal helped to arrange more than 100,000 home rentals last year and was used by more than 3,100 agents and 30,000 landlords. Over the past few years, BoligPortal has expanded its revenue streams to include services that connect tenants with utility, broadband service, and insurance providers. Over the long term, we expect BoligPortal to benefit from strong demand for rental housing in Denmark and Sweden and look for recurring subscriptions from its "software as a service" (or SaaS) product features to provide more-predictable revenue and cash flow, as well as additional revenue streams and services to landlords.

Ofir is Denmark's most comprehensive jobs universe, used by about 900 employers to post job vacancies via portals and social media sites such as LinkedIn, Facebook and Google. In 2020, employers posted more than 32,000 job announcements on the site, which is designed to reach both active and passive job seekers. Revenue rose 24% to 21 million DKK in 2020, and despite the impact of the pandemic, the business posted a profit in the last four months of the year. Management plans to expand Ofir by developing its sales infrastructure and advertising presence on social media. After a multiyear turnaround, in which EBIT improvement was driven mainly by cost cutting and the discontinuation of unprofitable operations, we expect revenue growth to become the key earnings driver going forward.

The company's newest business is Bekey, a provider of digital access solutions for multistory buildings as well as for private homes. Bekey technology opened doors 10 million times in 2020, up 25% from 2019. In 2020, the homecare segment in Denmark was the main contributor to growth, accounting for about 80% of

\* Stock Statistics in DKK \*\* Stock Statistics in EUR \*\*\* Stock Statistics in CHF

revenue. For the year, Bekey revenue rose 17% and the EBIT loss narrowed by 35% from 2019, to less than 7 million DKK.

Bekey also has invested in establishing a “stairwell” segment, which focuses on providing secure access for home delivery to buildings and home healthcare services. The Bekey solution is installed in approximately 54% of the secured stairwells in Greater Copenhagen. Its digital access solutions provide more than 30,000 approved users with easy access to multistory buildings and private homes through the use of NetKey, a cloud-based system that uses encrypted digital keys that cannot be lost or copied, and that enables users to open doors using Bluetooth and a mobile phone app. Chips are installed in the entryway of secured stairwells. Bekey also has generated higher license fees through contracts with approximately 30% of Denmark’s municipalities, an expanding segment. The company plans to extend coverage to over 60% of the secure stairwells in the Copenhagen area by the end of 2021, though we note that the timing of several contracts has been extended to the second half of the year, which could distort its underlying demand profile.

## RECENT DEVELOPMENTS

North Media shares trade on the Nasdaq Copenhagen Exchange under the ticker NORTHM. Year-to-date, the stock has increased 54%, versus a 27% increase for the OMX Nordic Small Cap Index benchmark, of which North Media is a constituent. In 2020, the stock rose 79%, compared to a 35% increase for the OMX Nordic Small Cap Index.

In August 2021, North Media reported 2Q21 EPS of 2.8 DKK, up from 2.6 DKK in the prior-year quarter, excluding returns on security investments in both periods. Second-quarter 2021 revenue increased 2% from the prior year. While first-half 2021 revenue was down 2%, EBIT margin during the period rose to 26.3% from 23.9% a year earlier. Also of note, the company raised the midpoint of its 2021 revenue and EBIT guidance by 1.5% and 6%, respectively, driven by reduced uncertainty relating to COVID-19 and its effects on leaflet volumes in the Last Mile business area.

In April 2021, Ofir announced a partnership with Google Jobs that will result in enhanced job search capabilities on the Ofir website, as well as on three other Danish job-listing sites, over Google’s platform.

In April 2021, North Media’s FK Distribution subsidiary expanded its partnership with Deutsche Post. Under the expanded agreement, which began on July 1, 2021, FK Distribution is packing leaflets for Deutsche Post to distribute to more than 480,000 German households.

## EARNINGS & GROWTH ANALYSIS

We forecast revenue of 1.03 billion DKK in 2021, implying a 2% decline from 2020, and 1.06 billion DKK in 2022, which assumes 3% growth from our 2021 estimate. We expect double-digit revenue growth in Digital Services to offset continued declines in the Last Mile distribution business, where revenue has fallen due to the migration of advertising to digital channels and the impact of COVID-19 on smaller businesses. During the first half of 2021, FK Distribution revenues declined 3%, which was offset partly by a 10% increase from Digital Services. In 2020, Last Mile accounted

for 87% of total company revenue. We expect this contribution to decline to 75% over the next 2-3 years, as the Digital Services segment, helped by new offerings and acquisitions, accounts for a larger percentage of revenue.

We project EBIT margins of 25.8% in 2021 and 26.2% in 2022, as the company continues to invest in Digital Services and generates efficiencies from Last Mile. We note that the company posted a record EBIT margin of 23% in 2020, up sharply from 15.9% in 2019 and 9.6% in 2018.

We forecast EPS of 11.18 DKK in 2021 and 11.74 DKK in 2022, excluding returns on securities investments. On this basis, North Media reported EPS of 10.3 DKK in 2020 and 5.9 DKK in 2019. (Including gains on investments, EPS came to 16.9 DKK in 2020 and 11.0 DKK in 2019.)

## FINANCIAL STRENGTH & DIVIDEND

Our financial strength rating on North Media is High. The company has ample liquidity and the resources to support a strong dividend, periodically repurchase shares, and develop its Digital Services segment.

Between 2016 and 2020, North Media increased its capital resources at a compound annual rate of 28%. As of June 30, 2021, it had 129 million DKK in cash on its balance sheet, and 642 million DKK in value from a portfolio of long-term, growth-oriented security investments, which contribute to current assets of 860 million DKK, compared with 146 million DKK in current liabilities. This portfolio appreciated by 154.5 million DKK in 2020 and 122 million DKK in 2019. As of June 30, 2021, total equity was 957 million DKK, up from 781 million DKK at June 30, 2020.

Net cash inflows from operating activities were 218.6 million DKK in 2020, up from 132.1 million DKK in 2019. Net cash outflows from investing activities were 47.3 million DKK, up from 31.3 million DKK in 2019. Net cash outflows from financing activities were 110.4 million DKK in 2020, up from 83 million DKK in 2019. In total, continuing operations generated 60.9 million DKK of total cash flow in 2020, compared with 17.8 million DKK in 2019.

North Media has a solid cash dividend and periodically buys back shares. In March 2021, it paid a 2020 dividend of 5 DKK per share, for a yield of 6% based on the company’s stock price at the end of 2020 (the current yield is 4.1%, after the stock’s 54% gain to date in 2021). Based on 2020 EPS excluding gains on security investments, the payout ratio is about 48%. North Media has distributed almost 300 million DKK to shareholders through dividends and stock buybacks since 2017, equal to 16.0 DKK per share. The company intends to continue paying a DKK 5 per share dividend annually between 2021 and 2023.

## MANAGEMENT & RISKS

Kare Wigh is the group executive director and chief financial officer of North Media A/S. He joined the executive board in 2006. Prior to North Media, Mr. Wigh held various managerial positions with the East Asiatic Company Ltd. of Singapore, Plumrose Latinoamericana in Venezuela, and EAC Shipping in Copenhagen. Mr. Wigh earned his HD and Executive MBA degrees from the Copenhagen Business School.

North Media's board currently has seven members, most of whom are independent. Its principal shareholder, founder Richard Bunck, holds 55.75% of the company's stock.

Risks for North Media include a decline in the volume of printed advertising in the FK Distribution business and increased competition in the print media space. The company also faces competitive and operational risks as it works to expand its Digital Services segment.

## COMPANY DESCRIPTION

North Media, established in 1965, has built a diverse portfolio of market-leading companies that link businesses and consumers in Denmark. Its Last Mile business unit operates FK Distribution, a distribution service that delivers direct mail and leaflets to consumers. Its smaller, but fast-growing Digital Services unit includes BoligPortal, a Danish home rental platform; Ofir, a job search platform; and Bekey, a provider of digital access solutions for multistory buildings and private homes. North Media is using cash generated by the established FK Distribution unit (85% of 2020 revenue) to develop its newer digital businesses. We expect these businesses, which have recently become profitable, to account for up to 25% of revenue over the next 2-3 years, up from 13%

in 2020. Over the long term, we also expect North Media to continue its international expansion, with new initiatives in Sweden, Germany, and other markets.

## VALUATION

We value NORTHM shares on a blended, sum-of-the-parts basis by using industry-average EV/EBIT multiples for each of the company's business segments, and weighting these multiples based on the estimated EBIT contribution of each segment in 2021. In our view, North Media warrants a more-modest discount to these benchmarks, given the long-term growth prospects of the Digital Services segment, the company's focus on shareholder returns through dividends and periodic stock buybacks, and its robust net-interest-bearing cash position that, in aggregate, mitigate a slower growth profile from FK Distribution.

Thus, we apply a multiple of 9 to FK Distribution EBIT of 243 million DKK (compared to a 10.5-times peer multiple) and a multiple of 23 to Digital Services EBIT of 27 million DKK (compared to a 27.7-times peer multiple) to arrive at a target enterprise value of 2.74 billion DKK, and a fair value estimate of 191 DKK per share, well above current levels. The 4.1% dividend yield, adds to the total potential return.

Steve Silver,  
Argus Analyst
